

# Stormwater Management & Grading Permit (SWG)

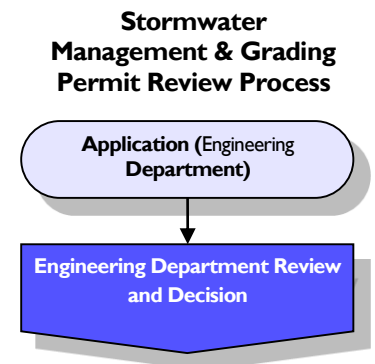

---

## General Description

The purpose of requiring a Stormwater Management & Grading Permit is to eliminate any non-allowable post construction discharges into Franklin's Municipal Separate Storm Sewer System that has an impact on water quality.

## The Review Process

1. Construction Plans associated with the Stormwater Management & Grading Permits shall be submitted through the City of Franklin Electronic Plan Review Website reviewed and approved as a site plan submittal. In addition to the construction drawings the applicant shall submit a drainage report and the *Inspection and Maintenance Agreement of Private Stormwater Management Facilities* for review and approval.
2. Following approval of the Site Plans and *Inspection and Maintenance Agreement of Private Stormwater Management Facilities* the applicant shall stop by the Engineering Department and submit a Permit Application and 1 full size and 1 half size copies of the approved site plan. The approved site plan and Inspection and Maintenance Agreement shall have City approval electronic stamps and signatures. In addition, the Inspection and Maintenance Agreement shall have a stamp indicating that it has been recorded at the Williamson County Deeds Office.
3. Within 14 business days the Engineering Department will calculate the necessary inspection fees, permit fees and process the approved permit application.
4. Following approval of the permit, the engineering department will contact the applicant to pick up their permit and pay the required inspection fees.
5. The applicant shall then schedule a meeting with the Stormwater Inspectors to inspect the erosion control measures. The applicant shall be required to bring the stamped and signed approved construction drawings and signed permit application to the meeting.
6. Upon completion of all of the above steps, the Stormwater Inspector will issue the Grading and Stormwater Permit, on-site, at the end of the meeting provided the improvements are completed in accordance to the approved plans.

## Submittal Requirements

The table below depicts the submittal requirements for Stormwater Management Permits:
